## **LISTING OF CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application:

- 1-74. (Cancelled)
- 75. (Original) A method of operating a gaming machine, comprising:

detecting the presence of a passerby proximate to the gaming machine, the passerby not playing the gaming machine; and

in response to detecting the presence of the passerby, modifying operation of the gaming machine.

- 76. (Original) The method of claim 75, wherein the step of detecting the presence of a passerby includes establishing a wireless transmission link between a first wireless transceiver on the gaming machine and a second wireless transceiver on the passerby.
- 77. (Currently Amended) The method of claim 76, wherein the second wireless transceiver in is disposed in a portable data unit carried by the passerby, the portable data unit containing information for allowing an identity of the passerby to be determined.
- 78. (Currently Amended) The method of claim [[77]] <u>75</u>, wherein the step of modifying operation of the gaming machine includes inviting the passerby to play the gaming machine further comprising receiving a wager from the passerby.
- 79. (Original) The method of claim 75, wherein the step of modifying operation of the gaming machine includes inviting the passerby to play the gaming machine.
- 80. (Original) The method of claim 75, further including operating the gaming machine in an attract mode prior to the step of detecting the presence of a passerby.

Amendment & Response to Non-Final Office Action dated January 4, 2005

- 81. (Original) The method of claim 75 further comprising determining the identity of the passerby.
- 82. (Original) The method of claim 81, further comprising inviting the passerby, based on the identity of the passerby, to play the gaming machine.
  - 83. (New) A method of operating a gaming machine, comprising:

detecting the presence of a passerby proximate to the gaming machine, the passerby not interacting with the gaming machine; and

in response to the detecting, modifying the operation of the gaming machine based on information wirelessly communicated between a portable data unit carried by the passerby and the gaming machine,

wherein the modifying includes inviting the passerby to interact with the gaming machine by placing a wager on a game playable on the gaming machine.
